British Journal of Cancer Research

2019; 2(4): 308 - 313. doi: 10.31488/bjcr.136

Appendix

Table 1. Regression co-efficients and 95% CIs for the intercept (baseline) and effect of time on the predicted proportion of patients referred for each of the four regression models (pre- and post-intervention, and with and without seasonality included as a covariate)"

		Intervention cohort		Non-intervention cohort	
		Pre intervention	Post intervention	Pre intervention	Post intervention
With season	Baseline	0.002 (-0.008, 0.013)	0.033 (0.012, 0.053)	0.014 (0.003, 0.024)	0.032 (0.020, 0.043)
	Time	0.000 (-0.001, 0.001)	-0.000 (-0.001, 0.000)	0.000 (-0.000, 0.001)	-0.000 (-0.000, 0.000)
Without season	Baseline	0.006 (-0.002, 0.013)	0.042 (0.027, 0.057)	0.025 (0.014, 0.035)	0.035 (0.026, 0.042)
	Time	0.000 (-0.001, 0.001)	-0.001 (-0.001, 0.000)	0.000 (-0.001, 0.001)	-0.000 (-0.000, 0.000)
